Niblo's Travel Talks.

Fred Niblo gave the second of his series of travel talks last night at the Academy of Music, taking his hearers through Egypt, from Cairo to Khartoum, along the River Nile. The trip was graphically described with the aid of colored views and motion pictures.

Port Said, the point of meeting between the East and West, was visited first, only a short trip being taken around this, perhaps the most corrupt city on the map. Some time was spent in Cairo, where the famous citadel and mosque were shown on the screen, as were the quaint customs and dress of the inhabitants.

From Cairo the trip up the Nile was begun, going through the country of the sphinx, the pyramids and the many silent monuments of the wonderful handlwork of the ancients, while much of the country passed through is also famous in Biblical history. Many landings were made for the purpose of visiting the dusty ruins of the world-renowned tempies, monuments and tombs, many of which show good preservation, even the frescond in several of the underground halls being still rich in color and design. The Temple of Luxor, the Tomb of Cethos, the Pyramid of Cheops and the immense hall in the temple at Karnack were visited in turn, while here and there were seen the numerous monuments oreated to himself by Ramases II, "the champion long distance self commemorator."

The great hyprovements in the irrigation of the country were shown in detail. The largest dam in the world, being built by the British government
